

Your On-Demand CTO

The I.T. help you need...when you need it

Large companies have a full-time Chief Technology Officer – a CTO – to guide their technology and manage the I.T. staff. It's a job for a manager who understands both technology and business.

For smaller companies, this expertise may only be needed at certain times. That's when your **On-Demand CTO** can step in to analyze technology needs, help create a strategy, and implement the technology solutions that are right for your business.

YOUR TURNKEY, COST-EFFICIENT SOLUTION

- Eliminate the expense of a full-time I.T. management leader while getting the expert advice you need
- Bring on a seasoned CTO who can:
 - Zero in on the issues
 - Provide actionable, sound, strategic recommendations
 - Oversee implementation*And then leave...until he's needed again*

Wayne M. Gura has managed I.T. for large multinational and small-to-medium-sized businesses in a wide range of industries – from professional, legal and financial services, to insurance, reinsurance and securities, to medical device manufacturing and electronic media.

From single-department to firm-wide initiatives, from long-term to short-term technology needs – Wayne has led projects of all sizes from concept to successful implementation.
